BioPhenom

About RTD TALOS

RTD TALOS is a development organization committed to advancing innovation and fostering sustainable growth for enterprises in Cyprus and beyond. Our mission is to deliver high-quality services with unwavering commitment and consistency, enhancing the competitiveness of Cypriot businesses through the promotion of cutting-edge innovation, seamless technology transfer, and effective utilization of research outcomes. We specialize in building robust links with research institutions, identifying and exploiting financing opportunities, and assisting organizations in leveraging development programs to achieve their strategic goals. With a strong focus on quality assurance, RTD TALOS ensures the success and excellence of every project we undertake, establishing ourselves as a trusted partner in the research and development ecosystem.

Role in BioPhenom

In the BioPhenom project, RTD TALOS leads Work Package 6, focusing on communication, dissemination, networking and clustering activities, exploitation and intellectual property rights management. Leveraging our extensive experience in managing and executing communication, dissemination and networking strategies as well as exploiting research results from various EU and national projects, we aim to maximize the project's outreach and impact.
Our responsibilities include developing comprehensive dissemination plans, creating engaging content for diverse audiences, and ensuring the effective communication of research findings. Additionally, we focus on the exploitation of project results by identifying opportunities for commercialization and ensuring that the innovations developed within BioPhenom reach their full potential in the market. Through our strategic approach and expertise, RTD TALOS is dedicated to enhancing the visibility and sustainability of the BioPhenom project, thereby contributing to its overall success and its positive impact on the industry and society.
